Specialists in software, website and design solutions for the holiday letting industry

HLS Solutions Limited Registered in England and Wales No. 07104476

Introduction

The Web upload module is an optional component that, once installed, will take property information automatically from the software and upload to an online SQL server for integration with a customer website. Once installed on the customer site, there is no further input required from the customer and the system will automatically update the online database with any relevant changes to the software as they happen.

This document is a developer guide providing information on the data that can be accessed from the database and providing example URLs for viewing and interrogating the database via a browser.

Viewing Property Availability

Processing steps:

i) Get authtoken from Test database

ii) Use following link.

http://winsrv106.pleskcontrolpanel.co.uk/holidaylettingfinder_com/GetService.aspx?operation=GetAvailabil ityDetails&AuthToken=5GlbBJjDEiJUEE4NeGvM&PropRefNo=P2010/0003&dateFrom=01/01/2011&dateTo= 30/04/2011

(Change RED marked text with your own authtoken)

For alternative results the PropRefNo and the dateFrom and DateTo information can simply be changed to search alternative parameters.
